

La grammaire inversée

# INSTRUCTIONS OF USE

Marco Vélez Barreiro  
(EOI da Coruña)

Proxecto realizado no marco dunha licenza por  
Formación retribuída pola Consellería de Educación  
durante o curso 2016-17.

« La grammaire inversée » comprises 20 short videos (3-7 minutes) about French grammar for the A2 level of the Common European Framework of Reference for Languages (CEFR). The videos have two series of versions: the « HTML version » and the « SCORM version ».

## 1) HTML versions

Each video is integrated in a web page that can be installed in a remote server or reproduced locally. To do so, open the correspondent folder and click on the file named “index”.

There are two HTML versions:

- a) **The Spanish HTML version** includes the 20 videos with subtitles in French, Galician and Spanish.
- b) **The English HTML version** includes the 20 videos with subtitles in French and English.

Each version includes some brief instructions in the corresponding languages, the videos with subtitles and a PDF document with activities that you can read on the screen, download and / or print, with the solutions.

Watch the videos and take notes as if it was a course with your own teacher. Should there be something you do not understand, go back and watch that part of the explanation again. If necessary, use the subtitles in English to fully understand the narration.

If, after having watched the video, there is still something you don't understand, write it down and ask the question to your teacher the next time you have class with him/her. Do the activities to practise the grammatical lesson and then check your answers.

## 2) SCORM versions

The SCORM versions allow you to interact with the videos by answering some questions about their content. If your teacher has decided to use this version, he/she will have given you some instructions on how to access the interactive files in the virtual class of your school.

There are four SCORM versions:

- a) **The French SCORM version**, which includes the 20 videos without subtitles or with subtitles in French.
- b) **The English SCORM version**, which includes the 20 videos without subtitles or with subtitles in English.
- c) **The Galician SCORM version**, which includes the 20 videos without subtitles or with subtitles in Galician.
- d) **The Spanish SCORM version**, which includes the 20 videos without subtitles or with subtitles in Spanish.

Play the video and watch it taking notes as if it was a course with your own teacher. From time to time, the recording will stop and you'll be prompted to answer some questions about the sequence that you've just watched. Answer the questions in order to be allowed to continue watching the video.
